

2019 QBE INTERNATIONAL FESTIVAL OF SPEED – SYDNEY MOTORSPORTS PARK

TIMING BULLETIN

Intermediate sector timing

The sector timing and speed trap loops will be in use. This will result in the lap being split into 3 separate timing sectors. The split times and top speed will be shown on the Race Display screen, the Compulive internet-based timing application, and in printed reports. Refer to the map below for approximate locations:

Timing transponder collection and deposits

Transponders will be available for collection from the bottom level of the control tower on Thursday morning from 7:15am. A \$50 refundable security deposit is required, which can be left in cash or by recording credit card details. **Transponders not returned to the timing room by the conclusion of the event will be subject to a minimum \$25 late return fee.**

Competitors who do not have their own mounting bracket already can buy them when collecting transponders for **\$10 each** (GST incl). They can then retain the bracket on their bike for future events.

Transponders have been allocated to individual machines in each class, so you don't need to swap transponders between machines.

Competitors using their own transponder will need to advise timing of the number.

Television live timing

Competitors bringing their own televisions can pick up timing information in garages by plugging in a standard aerial cable to the connection point in the garages. TV's should be manually tuned to **digital channel 401** for the Race Display screen. **Digital channel 402** will carry Computime Track Map positioning display.

Live timing on smartphone, tablet, or computer

Computime's local intranet site WILL NOT be set-up this weekend. For live timing on your smart phone, tablet, or computer, you will need internet access.

For LIVE TIMING, follow the links from www.computime.com.au.
