2027 SHANNONS AUSTRALIAN SUPERBIKE CHAMPIONSHIP

ROUND 2 – THE BEND MOTORPORTS PARK - SA

TIMING BULLETIN

Intermediate/sector timing

The sector timing and speed trap loops will be used to create three timing sectors. The split times will be shown on the television and in internet-based timing displays, and in results reports. Refer to the map below for approximate locations:

Timing transponder collection and deposits

Transponders will be available for collection from the timing room next to Race Control at the end of the main building on FRIDAY morning from 7:15am.

Transponder brackets and additional transponders

Transponder mounting brackets are available for sale for **$15 each** (GST incl) – EFTPOS and credit card ONLY – NO CASH.

Where you have not organized and paid for a second transponder for your spare bike as part of your entry, and want to hire one, these are available for **$25 each** (GST incl) – EFTPOS and credit card ONLY – NO CASH.

Timing transponder responsibility and return

The competitor acknowledges in participating in the event that failure to return the transponder within 30 minutes of the conclusion of the event may result in additional costs being incurred by the competitor. Further, if the transponder is damaged or lost, the competitor will be liable for repair or replacement costs of up to $800 per transponder.

Timing transponder mounting

It is your responsibility to ensure that timing transponders are properly mounted for all sessions (including practices and warm-ups). Instructions for the mounting of the transponder, can be provided when collecting the transponder where. Competitors found not to have transponders properly mounted, may be black-flagged from the session or have times excluded after the end of the session. Computime's back-up procedures ensure that accurate times are recorded if any competitor is found to have a faulty timing transponder.

Television live timing

Pit lane garages each have a permanent TV mounted to pick up timing and broadcast feed information. What is displayed is controlled by venue management. There are also additional aerial points with screw in ("F") connectors, where you can connect your own TV.

Automatically tuning your television should pick up these relevant channels:

- **Timing display**
- **Track positioning**
- **Circuit vision (Sunday only)**
- **Quad screen showing the above plus additional timing information**

Computime website for live timing and results

Computime's website will be available for competitors with internet enabled laptop computers, tablets, and smartphones. The intranet site features:

- All results from the meeting (only minutes after each session is completed).
- LIVE TIMING (for the session currently in progress).
- Pit board display showing extended information for a selected rider.

Follow the links from **www.computime.com.au.**

Jump start cameras

To ensure consistency and accuracy in the assessment of potential jumped starts, Computime's jump start camera system will be set-up this weekend as usual. This system includes simultaneously recording cameras on each grid row and the start light. Any movement at the time the red light is extinguished will result in the implementation of a penalty.
