# 2026 BOOST MOBILE AUSX SUPERCROSS SERIES – ROUND 4
# 2026 AUSTRALIAN SUPERCROSS CHAMPIONSHIP – ROUND 3

## HBF STADIUM – PERTH, WA – NOVEMBER 14

## TIMING BULLETIN

## Intermediate sector timing

Three intermediate timing points will be used in conjunction with the finish line timing loop to provide sector timing from 4 separate timing sectors. The split times will be shown on the Computime live timing web page, and in printed reports. Locations of the timing loops is planned as follows:

## Timing transponder matters

### *Collection / Checking*

Riders requiring the hire of a transponder, can collect at sign on from SATURDAY morning. **Transponder hire cost is $20 (EFTPOS and credit card only) and must be paid prior to collecting the transponder. Riders using their own transponders need to re-confirm the transponder number at sign-on.**

***Mounting***

It is your responsibility to ensure that timing transponders are properly mounted for all sessions (including practices). Riders found not to have transponders properly mounted, may be black-flagged from the session or have times excluded after the end of the session. Computime's back-up procedures ensure that accurate times are recorded if any competitor is found to have a faulty timing transponder. **TRANSPONDERS TO BE MOUNTED ON THE RIGHT-HAND SIDE OF THE FORKS.**

Riders using their own transponder must ensure that they are sufficiently charged. Where not sufficiently charged, riders will be required to hire a fully charged transponder from Computime.

***Transponder brackets***

Riders need to have their own mounting bracket permanently installed on their bike. Transponder mounting brackets are available for sale for **$15 each – EFTPOS and credit card ONLY** – NO CASH.

***Transponder return***

Competitors that have hired transponders from Computime, need to ensure that they return these at the conclusion of their racing, if they are not collected upon exiting the circuit by officials. Further details will be provided in relation to return location. Where transponders are not returned by the conclusion of the event, additional charges will become payable by the rider.

## Live timing and results

**Results after each session**

The following will be available from the Computime website (**computime.com.au**):

- **LIVE TIMING** for the session in progress
- **FULL RESULTS REPORTS** in PDF format for viewing and download after each session
- Rider positioning **TRACK MAP** showing estimated positions on the track for the session in progress
- **PIT BOARD** display (optimized for phones) showing all relevant timing information for a selected rider.

Follow the links for the event from the Computime home page.

**Television timing display**

A "big screen" summarized version of the Computime live timing display will displayed on big screen televisions at the venue.
